■ ABOUT ME

Curious mind, growing every day.

I'm **Soham Rajaram Ghadge**, a first-year B.Tech CSE student at MIT Academy of Engineering, Pune. My journey into technology is fuelled by genuine curiosity about how things work — from hardware circuits to web interfaces.

I believe in **consistency and hands-on learning**. Whether debugging code or exploring a new concept, I embrace every challenge as a stepping stone toward becoming a well-rounded developer.

My current focus is on programming fundamentals, problem-solving skills, and gradually building real-world applications with clean, elegant user experiences.

CAREER GOAL

"To grow as a skilled software developer, build meaningful products, and carve a successful career in the ever-evolving world of technology."

MY JOURNEY

2025 — **■ Started B.Tech CSE**
Joined MIT Academy of Engineering, Alandi, Pune.

2025 – Now — **■ Building Foundations**
Core CS subjects, academic projects, C programming, Python basics, and web fundamentals.

2025 → 2029 — **■ The Undergraduate Journey**
Four years of learning, building, and growing into a professional developer.

■ EDUCATION

Academic Foundation

Bachelor of Technology

Computer Science & Engineering

MIT Academy of Engineering, Alandi, Pune

Admission: 2025 Graduation: 2029 Full-Time Division: CS2 / C23

■ SKILLS

My Toolkit

Building from first principles — core languages, web basics, and the thinking skills that tie it all together.

■ Programming Languages

C [Strong] **Python** [Basic] **JavaScript** [Basic]

■ Web Development

HTML5 [Learning] **CSS3** [Learning] **Responsive** [Basics]

■ Core Strengths

Problem Solving Logical Thinking
CS Fundamentals UI/UX Concepts

■ PROJECTS

Things I've Built

Academic and group projects that reflect hands-on learning and real-world problem solving.

DIGITAL ELECTRONICS

■ Automatic Water Tap System

A hardware model demonstrating automation through sensor-triggered control of a water tap — showcasing real-world application of digital electronics concepts.

Digital Electronics Automation Hardware

DESIGN THINKING

■ Lost and Found Portal

A concept-based web portal for reporting and finding lost campus items — focused on problem identification, user journey mapping, and interface planning.

Design Thinking HTML / CSS Group Project

■ CONTACT

Let's Connect

Open to conversations about technology, opportunities, collaborations, or just a friendly hello.
